

Falling Cornices

Date

Sat, 03/01/2025 - 16:30

Activity

Skiing

Pictures of two cornice triggered avalanches way up the South Cottonwood drainage that was viewed from Alex Lowe. Looks to be in the recent days, around 9,000 feet North facing.

Also a massive cornice that had cracked and was slowly making its way towards falling down. Cornice was around 50 feet long, and largely overhanging. On the standard ascent of the East Ridge of Alex Lowe, the skin track usually travels below this cornice while ascending to the ridge.

Region

Northern Gallatin

Location (from list)

Alex Lowe Peak

Observer Name

Spencer Lipsteuer
